Pace and Final Time Ratings

What are they? Pace and Final Time Ratings are measures of a horse's speed at various points in a race expressed in numerical form. This allows for easy comparison of speed between different horses.

Pace Ratings (PAC RAT) measure a horse's speed through the first two calls in a sprint and the second two calls (half and six-furlong) in a route. It's an assessment of a horse's early speed or pace. The higher the Pace Rating, the faster the horse in the early part of the race.

Final Time Ratings (FNL RAT) consider only the final time earned by the horse. In theory, the higher the Final Time Rating, the faster the horse. Of course, Final Time Ratings are often influenced by what goes on early in the race (the pace).

NOTES: Took command entering the first turn and won easily June 8. Hard to load, dueled early, cleared entering the stretch and gamely

How do I use the Pace and Final Time Ratings?

There are various ways to use Pace and Final Time Ratings, but here are a few examples:

Finding the Quickest Frontrunner - If one speed horse can outrun the other speed horses in a race, it usually means curtains for the other frontrunners. If one of the frontrunners consistently earns higher Pace Ratings than his adversaries, he may boast a "pace advantage" in today's race.

Sprint to Route - If a horse has never routed before, Pace and Final Time Ratings can help determine whether he'll "go long." Horses who tend to do better going from a sprint to a route for the first time have Pace and Final Time Ratings either in balance (i.e., relatively the same) or show higher Final Time Ratings than Pace Ratings. This is usually an indication that the horse is finishing and might not mind a route.

A Strong Final Time Rating Last Race - Horses in good form usually earn strong Final Time Ratings in their last start. While the pace often can influence a horse's Final Time Rating (e.g., an easy lead, speed duel, etc.), horses with strong Final Time Ratings compared to their competition often run well right back.
